# Montenegro centralized solar power station energy storage

## Overview

---

The Montchevo Project will combine solar energy generation with a large-scale battery storage facility directly connected to Montenegro's new 400 kV transmission infrastructure, maximizing the use of the country's strategic interconnections, including the high-voltage direct current.

The Montchevo Project will combine solar energy generation with a large-scale battery storage facility directly connected to Montenegro's new 400 kV transmission infrastructure, maximizing the use of the country's strategic interconnections, including the high-voltage direct current.

The utility is procuring two grid-scale battery storage systems to the tune of EUR 48 million (\$55.9 million). EPCG, Montenegro's largest electricity provider, is investing in two four-hour battery energy storage systems (BESS) to strengthen grid resilience and balance supply and demand. Each.

Montenegro has taken a decisive step toward modernizing its power system with a €48 million investment in large-scale battery energy storage systems (BESS). State-owned utility Elektroprivreda Crne Gore (EPCG) has launched an international tender for two commercial and industrial energy storage.

October 13-14, 2025 at the Palace of Congresses in Tirana, the European Commission (Directorate-General for Neighbourhood and Enlargement Negotiations – DG ENEST), the Montenegrin Investment Agency (MIA), and CWP Europe signed a Joint Declaration of Support for the development of the Montchevo.

EPCG's latest project aims to address these gaps, positioning battery storage as a cornerstone of grid modernization and a critical tool for achieving national sustainability targets. Montenegro's energy landscape reflects a blend of historical reliance on hydropower, particularly through.

Montenegro's power utility, Elektroprivreda Crne Gore (EPCG), is preparing to open a significant tender for the procurement of battery energy storage systems (BESS) with a total capacity of 240 MWh. This initiative is part of the country's broader strategy to enhance its energy infrastructure and.

Montenegro's state-owned power company, Elektroprivreda Crne Gore (EPCG), is pioneering the installation of battery energy storage systems (BESS) to enhance energy system efficiency and support renewable energy integration. Main Content: Elektroprivreda Crne Gore (EPCG), the largest state-owned.
