

A-Core Container

Mozambique Solar Container Panel House BESS

Overview

Develop, finance, build, operate and transfer two batches of solar photovoltaic (PV) systems with battery storage (BESS) projects with total capacity indicatively 25-30 MW in the provinces of Nampula, Zambezia, Sofala and Gaza. These projects will produce energy corresponding to the current consumption of about 80,000 Mozambican households. State utility EDM will be the key offtaker and counterpart of the Power Purchase Agreements (PPA). The call for prequalification was launched in July 2024 and the shortlist of five firms was published in June 2025.
