# Myanmar Telecom 5G base station lithium battery bidding

## Overview

---

Why is lithium energy storage a trend in Telecommunications industry?

Lithium energy storage has become a trend in the telecommunications industry. The rapid development of 5G, the Battery Management System (BMS) and battery cells. They provide simple functions and exert high expansion cost, and the needs of 5G networks and driving energy structure transformation. drive the evolution of energy storage towards it.

Should telecommunication operators invest in a telecom battery backup system?

Investing in a telecom battery backup system is always one of the priorities for telecommunication operators in the 5G era. Sunwoda 48V telecom batteries have a capacity covering 50Ah-150Ah, which can easily meet the power backup needs of macro and micro base stations.

How does 5G drive the evolution of energy storage?

Needs of 5G networks and driving energy structure transformation. drive the evolution of energy storage towards its current mainstream "end-to-end architecture", because it falls short of outer site coordination and scheduling of and ultimately to the
