El Salvador is making significant strides to expand its renewable energy capacity, with new solar and wind projects set to come online by 2025. At the forefront is AES El Salvador, which is bringing its Bósforo solar project to full operation and advancing the upcoming Capella Solar project.

Between 2015 and 2023, El Salvador experienced a 160-fold increase in its solar energy generation capacity, according to statistics from the Latin American Energy Organization (Olade). This increase is the result of a greater number of solar farms in the territory, which contribute to the energy.

As countries around the world shift towards renewable energy sources, El Salvador is gradually increasing its solar and wind energy capacity. While the progress is commendable, particularly in solar, there is still ample room for further development and investment in the country. The growth.
