Newly planned solar module projects

Overview

Search latest and upcoming global solar photovoltaic (PV) projects, bids, RFPs, ICBs, tenders, government contracts, and awards with our comprehensive online database. What is the major solar projects list?

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development. The list is for informational purposes only, reflecting projects and completed milestones in the public domain.

How is the list of solar projects gathered?

The information in the list was gathered from public announcements of solar projects in the form of company press releases, news releases, and, in some cases, conversations with individual developers. It is not a comprehensive list of all utility-scale projects under development.

How many solar projects are there?

There are more than 8,100 major solar projects currently in the database, representing over 340 GWdc of capacity. There are over 1,300 major energy storage projects currently in the database, representing more than 104,000 MWh of capacity. The list shows that there are more than 180 GWdc of major solar projects currently operating.

When will Gemini Solar start operating?

Outside of these states, the Gemini solar facility in Nevada plans to begin operating in 2024. With a planned photovoltaic capacity of 690 megawatts (MW) and battery storage of 380 MW, it is expected to be the largest solar project in the United States when fully operational. Battery storage.

What is the largest solar project in the United States?

With a planned photovoltaic capacity of 690 megawatts (MW) and battery storage of 380 MW, it is expected to be the largest solar project in the United

States when fully operational. Battery storage. We also expect battery storage to set a record for annual capacity additions in 2024.

How many solar projects are in the pipeline?

There remains an enormous amount of capacity in the pipeline, with more than 160 GWdc of large-scale solar projects either under construction or under development. The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.
