# North Africa PV Energy Storage Retail Prices

## Overview

---

How much does a solar PV project cost in North Africa?

The NPC for the PV-based solar schemes planned to be founded in Libya, Tunisia, Algeria and Morocco were determined to be about US\$3.14B, US\$16.8B, US\$13.9B and US\$13.1B, respectively. The COE and unmet electric loads of the examined twelve PVs across the four remaining North African countries are depicted in Fig. 5, Fig. 6.

Does Africa need a large-scale solar project?

The declining cost of solar PV and batteries, along with a strong business case to combine solar and storage into one project, is a robust driver of large-scale-solar deployment across Africa. Have you read?

Still, African countries must tackle market-specific challenges to narrow the power demand-supply gap. These challenges, among others, are:.

Is solar PV a focal energy resource for Africa?

Solar PV, which, as reported by our colleagues at PV Tech in their write-up of the AFSIA report, reached 19.2GW in 2024, increasing by 2.5GW on 2023 levels, is becoming the focal energy generation resource for Africa.
