North American Hybrid Energy Storage Power Generation Project

Overview

What is a hybrid and co-located power plant data product?

This data product presents an annual snapshot of trends in hybrid and co-located power plants. It summarizes public empirical data, especially from the U.S. Energy Information Administration (EIA), the Federal Energy Regulatory Commission (FERC), and transmission provider interconnection queues.

What is hybrid energy storage systems (Hess)?

Hybrid Energy Storage Systems (HESS) is a reliable approach to overcome this issue. HESS combines various storage technologies to improve both the performance and reliability of the grid systems. In this review, we summarize the advantages and development needs of HESS in comparison to standalone Energy Storage Systems (ESS).

Are energy storage projects flooded interconnection queues 'overnight'?

Energy storage projects, particularly battery energy storage systems (BESSs), have flooded interconnection queues across North America “overnight”.
