North Asia New Energy Charging Station

Overview

Who is new energy Asia?

Spent three years at a motoring newspaper and short stint with a magazine prior to joining this website. New Energy Asia (NEA) has been formed as a joint venture between Hicom Engineering and Hangzhou Flash Charging (HFC) for the distribution rights to charging equipment in the Malaysian and Asean markets.

Does new energy Asia sell Lotus EV charging products?

Although the range of products are currently shown with Lotus branding, New Energy Asia can also distribute its EV charging products on a white-label basis for sale to business operators who intend to target EV users beyond just customers of Lotus EVs, Hicom Engineering said.

Will new energy Asia launch a full range of Lotus charging stations in Malaysia?

DRB-HICOM group managing director and HESB chairman Tan Sri Syed Faisal Albar said that starting today, New Energy Asia will begin the nationwide rollout of a full range of Lotus charging stations in Malaysia.

Does Nea offer AC chargers?

In addition to its range of air- and liquid-cooled DC fast chargers, NEA will also distribute AC chargers, including a smart AC charger that can be configured for 7.4 kW, 11 kW and 22 kW output levels.

When will new energy Asia start a manufacturing facility?

Meanwhile, HESB chief operating officer Hazrin Fazail Haroon said that New Energy Asia aims to set up a manufacturing facility within the next two years, depending on market demand. The targeted location for the facility is Tanjung Malim, Perak.
