pv Europe and industry association Solar Macedonia are working to advance the solar future of North Macedonia. With 900 MW of installed capacity, North Macedonia's solar sector is scaling rapidly, while battery storage is gaining momentum. Find out more in our daily focus, 15-18 September. North.

Power utility Elektrani na Severna Makedonija estimated that it requires EUR 3 billion by 2040 to replace electricity from its lignite-fired power plants. According to member of the Board of Directors Ivan Stojanovski, the state-owned company is preparing investments in gas power plants, solar.

A city where sudden power outages become as rare as unicorn sightings, and solar panels work overtime even after sunset. That's the promise of the Skopje Energy Storage Project – North Macedonia's answer to the \$33 billion global energy storage industry [1]. Designed for tech-savvy policymakers and.

The Oslomej solar park, operated by Fortis Energy, is getting a battery system of 62 MW in capability. The Turkey-based company hired Pomega for the investment. It would make the second-largest photovoltaic unit in the Western Balkans a hybrid power plant. It is the first utility-scale energy.

Turkish company Fortis Energy has announced plans to integrate battery storage capacity at the Oslomej solar power plant, making it the second-largest hybrid power facility in the Western Balkans. Fortis Energy developed North Macedonia's largest solar power plant in 2023, with electricity.

With renewables contributing 18% of its electricity in 2024 [1], the country is racing to solve the ultimate puzzle: how to keep the lights on when the sun isn't shining and the wind stops blowing. Let's unpack this energy storage revolution that's got everyone from Brussels to local farmers.
