# On-site energy prices for solar installations in China

Overview

In late January and early February 2025, China announced new solar and renewable energy pricing regulations. Starting May 31st, solar installation will no longer benefit from fixed feed-in tariffs and will instead be priced based on market dynamics.

China is on track to set a new record for solar power installations in 2024, driven by falling production costs and increased global interest in renewable energy, said industry experts and company executives. With the world's largest, most complete new-energy industry chain, China is expected to.

TrendForce's latest findings reveal that government incentives in China are boosting overall solar demand and creating a sense of supply tightness in the PV module market. This surge is expected to trigger a moderate demand peak in March and April 2025, likely pushing prices across the solar value. Will China set a new record for solar power installations in 2024?

China is on track to set a new record for solar power installations in 2024, driven by falling production costs and increased global interest in renewable energy, said industry experts and company executives.

Will new power pricing measures in China lead to higher solar prices?

Analysis by S&P Global suggests new power pricing measures in China could bring a rush of new installations in the country during the first half of the year and lead to an increase in solar module prices first domestically, then internationally.

How much does a solar system cost in China?

Component Checklist: Solar systems in China offer exceptional value at

40-60% lower costs than Western markets. Quality systems start at ¥15,000 ($2,100) with 6-8 year payback periods. This article will take you through solar system price in china: how much does it really cost, but the quality varies greatly by supplier and system type.

How much does a 5kw Solar System cost in China?

Prices have dropped significantly, but quality varies widely across suppliers and system types. A complete 5kW solar system in China costs ¥15,000-¥30,000 ($2,100-$4,200), with Tier-1 panels from Longi or Jinko at ¥0.9-¥1.3 ($0.13-$0.18) per watt. Installation adds 10-20% to the total price.

How much solar power will China install this year?

With the world's largest, most complete new-energy industry chain, China is expected to install 230 to 260 gigawatts of solar capacity this year, topping the record of 217 GW set last year, according to the China Photovoltaic Industry Association.

How many solar PV installations are there in China this year?

"Solar PV installations have maintained a quite high pace this year, and we had seen an average of over 18 GW of monthly installations this year in China till October," said Zhu Yicong, vice-president of renewables and power research at global consultancy Rystad Energy.
