

## A-Core Container

# Peruvian lithium battery energy storage company

## Overview

---

Antagold Lithium Investment del Peru operates in Peru's lithium sector, focusing on sustainable extraction and processing to supply high-purity lithium carbonate and hydroxide for electric vehicle batteries and energy storage systems. Does Peru produce lithium batteries?

"We have a lot of reserves and we think this is an opportunity and a challenge to carry out (lithium) extraction and value-added production," Chavez said. To be sure, Peru currently produces no lithium and no country in Latin America produces lithium batteries at a commercial scale even if they do mine lithium.

Where are lithium batteries made?

But those deposits are significantly smaller than those in the so-called Lithium Triangle, made up of Bolivia, Chile and Argentina. Batteries made from the ultralight metal lithium are key to meeting the growing demand for electric vehicles as part of a transition away from combustion engines.

Are lithium batteries the future of electric vehicles?

Batteries made from the ultralight metal lithium are key to meeting the growing demand for electric vehicles as part of a transition away from combustion engines. "We have a lot of reserves and we think this is an opportunity and a challenge to carry out (lithium) extraction and value-added production," Chavez said.
