## Overview

---

What type of power outlet does Peru use?

Peru uses three different power outlet types. Expect to find Type A/B, which is common in North America, as well as Type C, which is the standard in most of Europe. The vast majority of Peruvian power outlets will accept either of these three types. However, a rare few outlets only take inputs from a specific region, either Type A/B or Type C.

What voltage does Peru use?

Also, the voltage in Peru is the same as European voltages. What Outlet does Peru Use?

Type A electrical plug sockets are used in North and Central America, including the United States, Canada, and Mexico. They have two flat pins and no grounding pin. These outlets are typically used with devices that have a voltage of 110-120V.

Do I need a voltage converter in Peru?

If your device operates on a different voltage (such as 110V, which is common in the U.S.), you will also need a voltage converter to safely use your devices in Peru. Electrical outlets in Peru are often designed to incorporate both plug types (see first image below). A round-prong plug as used in Peru.

How many types of electrical outlets are there in Peru?

There are three different types of electrical outlets in Peru. One outlet (Type A) accepts a flat parallel two-prong plug, and another (Type B) takes a three-prong plug. Outlets A and B are the same as those found in the United States. The third type of outlet (Type C) accepts a circular two-prong plug.

What types of plugs are used in Peru?

Electrical outlets in Peru are often designed to incorporate both plug types

Does Peru have a power adapter?

This Power Adapter is a great option if you want to make sure your charging devices will be compatible throughout the country of Peru. It's also compatible in dozens of countries around the world and has a built-in fuse that will protect your valuable electronics during the relatively frequent power surges experienced in Peru.
