# Poland hybrid energy storage project construction

## Overview

---

With a symbolic ground-breaking ceremony, the PGE Group has launched the construction of a battery-based energy storage facility with the installed capacity of 263 MW and the storage potential of 900 MWh. The project is scheduled for completion in the second quarter of 2027.

With a symbolic ground-breaking ceremony, the PGE Group has launched the construction of a battery-based energy storage facility with the installed capacity of 263 MW and the storage potential of 900 MWh. The project is scheduled for completion in the second quarter of 2027.

PGE has launched the construction of a battery-based energy storage facility with the installed capacity of 263 MW and the storage potential of 900 MWh. The project is located in Żarnowiec, Pomorskie voivodeship, close to offshore wind farms and a pumped storage power station. The project received.

Polish utility PGE Group is planning to add more than 80 energy storage facilities through to 2035 to the tune of PLN 18 billion (\$4.7 billion). One of these will be the 981 MWh Żarnowiec battery energy storage project, which will be supplied with locally produced LG Energy Solution's grid-scale.

The PGE Group is carrying out analytical and preparatory work on energy storage development opportunities. The strategic aspiration is to build 800 of storage capacity by 2030. The PGE Group currently sees potential for the development of electrochemical electricity storage facilities, including.

29.10.2025 - Axpo and Energix, a leading renewable energy developer and independent power producer (IPP), have signed an agreement to optimise the largest battery energy storage system (BESS) in Poland. This is yet another such contract to be signed by Axpo in Poland this year. Under the agreement.

Polish state-owned power firm PGE has commenced construction of a 262MW/981 MWh battery energy storage system (BESS) in Żarnowiec, marking a significant milestone in the country's energy infrastructure development. The project utilizes locally manufactured LG batteries and represents one of the.

Axpo and Energix have formalized a strategic agreement to optimize Poland's largest battery energy storage system, representing a significant development in the country's energy infrastructure modernization. The collaboration adds to Axpo's growing portfolio of storage projects across Europe and.
