# Price of home micro solar panels

## Overview

---

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

How much does a solar system cost in 2025?

Solar panels generate “free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025. That price effectively drops to \$19,873 after considering the full federal solar tax credit.

How much does a solar inverter cost?

Inverter: A solar inverter converts the generated DC electricity into AC electricity that can be used to power your home. The cost of an inverter depends on its size and efficiency, but these devices typically cost between \$1,000 and \$3,000. Mounting system: This is what holds rooftop solar panels in place.

How much does a solar panel cost at Lowes?

A typical price for a Solar Panel is \$258 but can range from approximately \$20 to \$3,249. These Solar Panels are the most popular among Lowe's entire selection. While these are popular, we recommend ensuring that the Solar Panels you consider have the right mix of features and value.

Does solar cost a lot?

The overall cost of solar can be influenced by the solar incentives available. Across the U.S., homeowners can apply for the federal solar tax credit. The solar tax credit makes installing solar more cost-effective by providing

homeowners with a tax credit equal to 30% of the cost of their installed solar panel system.

How much do solar panels cost in New York?

As of 2024, the average cost of solar panels in New York is \$3.30 per watt, making a typical 6.9 kilowatt (kW) solar system \$16,632 after claiming the 30% federal solar tax credit now available. This is higher than the average price of residential solar power systems across the United States, which is currently \$3.00 per watt.
