Price of polysilicon solar panels

Overview

InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends and solar panel costs with our comprehensive market analysis.

InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends and solar panel costs with our comprehensive market analysis.

Track real-time and historical polysilicon prices across global regions. Updated monthly with market insights, drivers, and forecasts. The chart below highlights monthly polysilicon prices across different regions. [Get Access to Monthly/Quarterly/Yearly Prices, Request Sample Northeast Asia: In.](#)

In a new weekly update for pv magazine, OPIS, a Dow Jones company, provides a quick look at the main price trends in the global PV industry. The Global Polysilicon Marker (GPM), the OPIS benchmark for polysilicon outside China, was assessed at \$21.652/kg, or \$0.049/W this week, down by 1.89% from.

From upstream polysilicon, wafers and cells, to downstream panel prices, OPIS Global Solar Markets keeps you updated on solar price trends and forward prices. It is the first solar materials price report to use an assessment methodology that follows IOSCO requirements for fair and transparent. What's going on with polysilicon prices?

The index of InfoLink for non-Chinese polysilicon remains flat at US\$18/kg. Polysilicon prices are currently still supported by relatively strong wafer production, but the expectations for solar end demand in the fourth quarter remain low. PVinsights has already noticed declining prices of wafers and solar cells this week.

How much did polysilicon cost in 2004?

Due to the strong demand and the higher polysilicon costs, the average module price increased to \$3.35/W in 2004. With a specific silicon consumption of 13 g/W and an annual spot price average of \$43/kg, the share of the higher polysilicon costs (\$0.56/W) in the module price (\$3.35/W) rose only slightly to 16.7 % in 2004.

How much does solar silicon cost?

When the second Solar Silicon Conference took place in April 2005, the spot price already stood at \$80/kg.

How much does non Xinjiang polysilicon cost?

Currently, non-Xinjiang polysilicon with traceability data generally carries a quoted premium of RMB 3–5/kg. Polysilicon prices in dollar terms are prices for polysilicon with non-China origins in dollar terms, not translated from RMB prices.

How much did polysilicon cost in Q2 2025?

From global manufacturers to government agencies, our clients rely on us for accurate pricing, deep market intelligence, and forward-looking insights. In Q2 2025, the polysilicon prices in the USA reached US\$ 30 per metric ton in June. Explore live polysilicon price trend, index, and chart with forecasts.

What is the global polysilicon market size?

The global polysilicon market size reached USD 12 Billion in 2024. By 2033, IMARC Group expects the market to reach USD 25.1 Billion, at a projected CAGR of 8.70% during 2025-2033. The increasing shift toward renewable energy sources, particularly solar power, has significantly impacted the polysilicon market.
