# Saudi Arabia develops energy storage battery project

## Overview

---

The Saudi Electricity Company is building two major battery energy storage projects in northern Saudi Arabia with Hithium, totaling 4 GWh of capacity. The installations will be located in Tabuk and Hail provinces and will rank among the largest BESS deployments.

The Saudi Electricity Company is building two major battery energy storage projects in northern Saudi Arabia with Hithium, totaling 4 GWh of capacity. The installations will be located in Tabuk and Hail provinces and will rank among the largest BESS deployments.

BYD and Saudi Electricity Company will deliver a record 15.1GWh of storage, advancing Saudi Arabia's Vision 2030 and accelerating clean energy goals. Battery storage projects play a vital role in enhancing grid stability and efficiency, making them essential for modern energy systems. Battery.

Updated August 29, 2025: Saudi Arabia is making advances in its BESS projects as it launches one of Middle East's largest BESS deployments, a 4GWh BESS project. The nation's battery storage drive comes as HiTHIUM is commissioned with a 4 GWh BESS project in a joint venture between the Saudi.

BYD & SEC launch world's largest grid-scale battery storage for Vision 2030 goals. Battery storage systems are becoming crucial for stabilizing electricity grids and supporting the transition to renewable energy. These technologies lower energy costs, boost the use of renewables, and reduce.

Saudi Arabia is rapidly emerging as one of the world's largest markets for battery energy storage systems (BESS), with over 6.2 GW of upcoming capacity and a long-term target of 48 GWh by 2030. The Kingdom has already tendered more than 26 GWh of storage projects, with over 6 GW under construction.

Saudi Arabia is making history with the world's largest grid-scale battery energy storage project. BYD Energy Storage has signed a 12.5 GWh contract with the Saudi Electricity Company (SEC), bringing their total collaboration to

15.1 GWh. This big project will help Saudi Arabia reach its Vision.

The 2 GWh battery energy storage system (BESS) features 122 prefabricated storage units, designed and supplied by China's BYD. From ESS News Saudi Arabia has officially connected its largest battery energy storage system (BESS) to the grid, marking a significant milestone in the country's renewable.
