Serbia 5G communication base station inverter grid distribution

Overview

Can 5G enable new power grid architectures?

This report on bringing 5G to power explores how the shift to renewables creates opportunities and challenges through connected power distribution grids.

How can 3GPP 4G & 5G improve power grid management?

To meet changing patterns in power grid management, utilities companies are now employing 3GPP 4G and 5G network solutions to strengthen the security and resilience of power grids and boost operational efficiency.

Will Serbian 5G auctions be transparent and technology-neutral?

The Chinese tech player holds a temporary licence to use the 3400 MHz (transmitting frequency) and 3600 MHz (receiving frequency) bands. Officials questioned this speculation, saying that Serbian 5G auctions will be transparent and technology-neutral, so that all operators have the right to purchase equipment from any manufacturer.

How many power grid operators are there in Sweden?

In Sweden, there are approximately 180 power grid operators.

What is Ericsson doing with 5G for industries?

Ericsson is driving 5G for Industries initiatives with multiple partners to ensure we understand the demands and develop the right technology for real-world applications, and to materialize how our technology will accelerate innovation.
