# Seychelles new energy storage project

## Overview

---

With commissioning planned for 2026, the Seysun Lagoon project will play a pivotal role in helping Seychelles achieve its goal of sourcing 15% of national electricity from renewable energy by 2030, while also setting a benchmark for floating solar innovation in the Indian Ocean and.

With commissioning planned for 2026, the Seysun Lagoon project will play a pivotal role in helping Seychelles achieve its goal of sourcing 15% of national electricity from renewable energy by 2030, while also setting a benchmark for floating solar innovation in the Indian Ocean and.

WASHINGTON, June 30, 2025— The Republic of Seychelles is taking a major step toward a more sustainable and resilient energy future with the launch of the Seychelles Renewable Energy Acceleration Program (REAP), approved by the World Bank's Board of Executive Directors on May 30, 2025. Over the next.

The Seychelles has long faced challenges in its journey towards renewable energy, primarily due to limited land availability, suboptimal wind resources, and its reliance on Heavy Fuel Oil and diesel. This dependency has resulted in some of the highest electricity tariffs in the world, placing.

Well, their new dam project isn't just about concrete and turbines—it's rewriting the rules of energy independence. With 98% of Seychelles' electricity historically from imported diesel, this \$73 million hybrid dam-storage system could slash energy costs by 40% while achieving 65% renewable.

The Seychelles Energy Storage Station isn't just another infrastructure project – it's the backbone of an island nation's quest to marry sustainability with reliability. Let's unpack how this Indian Ocean paradise is rewriting the rules of energy storage. With tourism contributing over 25% of GDP.

t, a 5MW solar PV plant with battery storage. The Republic of Seychelles has inaugurated its second clean energy project power plant to the main island of Mahé. This system helps increase the Seychelles' Public Utilities Corporation (PUC). The PV array is specifically designed to maximise.

Paris & Mahé, 30 September 2025 – Independent renewable energy company Qair has officially launched construction of the Seysun Lagoon Floating PV plant, an ambitious 5.8 MW project located in the Providence Lagoon on Mahé Island. The ceremony was held in the presence of Flavien Joubert, Minister of.
