# Seychelles solar Energy Storage System Project

## Overview

---

The project includes an energy storage system with a capacity of 5MW and 3.3 megawatt-hours(MWh),allowing for the safe and stable supply of electricity from the PV power plant to the main island of Mahé; and further increasing the resilience of the national grid of the Seychelles.What is the energy storage system in the Seychelles?

The project includes an energy storage system with a capacity of 5MW and 3.3 megawatt-hours (MWh), allowing for the safe and stable supply of electricity from the PV power plant to the main island of Mahé and further increasing the resilience of the national grid of the Seychelles.

Does Seychelles have a 5MW solar PV plant?

The Republic of Seychelles has inaugurated its second clean energy project, a 5MW solar PV plant with battery storage. The Republic of Seychelles has inaugurated its second clean energy project, a 5MW solar PV plant with battery storage.

Where are the solar power plants located in the Seychelles?

The facilities include the 5MW solar PV plant located in Ile de Romainville, a 3.3 MWh energy storage system located on Mahé and a 33kV system that allows for the safe and stable supply of electricity from the PV power plant to the main island of Mahé. This system helps increase the resilience of the national grid of the Seychelles.

Will PV affect the small power system in Seychelles?

If Photovoltaic (PV) systems grow on the power system in Seychelles, issues such as the impact on system frequency due to PV output fluctuations are expected. There are concerns that it may prevent Seychelles from achieving its ultimate renewable energy goal of "15% renewable energy deployment rate by 2030.

Can Seychelles promote the deployment of PV in the future?

To promote the deployment of PV in Seychelles, it would be necessary to address the impact of PV output fluctuations on the grid. Okinawa Prefecture, an island region similar to Seychelles, has implemented measures for this purpose as one solution.

How much energy will the Seychelles save a year?

This system helps increase the resilience of the national grid of the Seychelles. It is estimated that the project will save approximately 2 million liters of fuel annually and offset 6,000 tonnes of carbon dioxide. Have you read?
