Small-scale energy storage project development in Georgia

Overview

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties.

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties.

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties. The BESS projects were authorized by the Georgia Public Service Commission (PSC) through.

Georgia Power recently announced that construction is underway for four new battery energy storage systems in strategic counties across the state to support energy capacity needs. The facilities, which are scheduled to begin operation in 2026, total 765 megawatts of additional storage capacity.

Georgia Power senior VP and senior production officer, Rick Anderson, cuts the ribbon on the utility's first 65MW BESS project in 2024 alongside Kim Greene, president and CEO of Georgia Power (second from right), with Georgia Public Service Commissioners Tim Echols (left) and Fitz Johnson. Image:.

Georgia Power has embarked on an ambitious initiative to enhance the state's energy infrastructure by commencing the construction of 765 megawatts (MW) of new battery energy storage systems (BESS) across four counties in Georgia. This strategic move aims to bolster grid reliability and support the.

Georgia Power is set to revolutionize energy storage with the construction of Battery Energy Storage Systems (BESS) across four counties in Georgia, totaling 765 MW of capacity. This ambitious project will enhance energy supply reliability and foster a greener future, directly benefiting.

Georgia Power will soon flip a switch and turn on its latest clean energy construction project: battery storage. When millions of Georgians begin their day by turning on lights, the coffee machine, take a shower, dry their hair, and run the dishwasher, the energy demand in the state spikes. Clean. Where are Georgia Power's new battery energy storage systems located?

Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties.

Who sanctioned battery energy storage systems in Georgia?

The systems are sanctioned by the Georgia Public Service Commission through the Integrated Resource Plan. Credit: Georgia Power. US-based electric utility Georgia Power has commenced construction of new battery energy storage systems (BESS) across the state of Georgia, totalling 765MW capacity.

How many battery energy storage sites are there in Georgia?

Construction is underway at four new battery energy storage system sites located across Georgia, including one in Bibb County totaling 765 megawatts of power, Georgia Power announced Wednesday in a news release. The 128 megawatt BESS site in Bibb County follows the state's first ever BESS site near Columbus, which entered service in 2024.

How many MW is a Bess project in Georgia?

As of this week, construction on those projects is officially underway. In total, 765 megawatts (MW) worth of new BESS will be strategically located across Georgia in Bibb, Lowndes, Floyd, and Cherokee counties.

What does Georgia Power do to meet Georgia's growing energy needs?

Georgia Power said it's committed to helping customers add their own solar panels and batteries to meet Georgia's growing energy needs. "Georgia Power is also committed to supporting customer-sited generation resources to meet the state's growing energy needs," the release reads.

How many MW of new battery energy storage will be available?

An additional 1,000 MW of new battery energy storage is expected to be

procured in the coming years through competitive bidding processes and a 13 MW demonstration project is in development at Fort Stewart Army Installation near Savannah, Georgia.
