Solar module exports ranked first

Overview

PVTIME - In terms of shipments in the first three quarters of 2024, there should be no suspense in the top 10 list of global PV module shipments, with Jinko Solar now leading JA Solar by around 10GW with shipments of 67.65GW in the first three quarters, followed by LONGi and Trina with 16GW and 17GW respectively. Who makes the most photovoltaic modules in the world?

Infolink Consulting has released the global photovoltaic module supply ranking for the first half of 2024. In a survey of manufacturers, changes were detected in the major global leaders. Jinko Solar ranks first, followed by JA Solar and Trina Solar. Longi ranks fourth, followed by Tongwei, Astronergy and Canadian Solar.

Who makes the most solar modules in the world?

Jinko Solar, JA Solar, LONGi and Trina Solar remain in the top four in terms of module shipments. Tongwei currently ranks fifth. Tongwei started manufacturing solar modules in August 2022. It was ranked 8th in the world that year, with shipments of 7.94GW. It then ranked 6th with 31.11GW, and 5th in the first half of 2024 with 18.67GW.

Did China Export more solar cells in the first 10 months?

According to Tan Youru, an analyst at BloombergNEF, China exported 212 GW of solar cells and modules in the first 10 months of 2023, some 19 percent more than exports in the whole of 2022. While the value of solar product exports from China was flat in the third quarter, volumes rose month-on-month, thanks to lower module prices, he said.

Where do solar PV exports come from?

The latest monthly solar PV export data from the world's largest exporter, China, by country or region of destination. Ember China solar export dataset provides the following information: The IEA has stated that China's solar photovoltaic exports account for 80% of the global market.

Which country exports the most PV modules in 2022?

The European Union was the biggest destination for China's PV exports in 2022, buying nearly \$23 billion worth of products, up 113 percent year-on-year. This is equivalent to about 84 GW of modules, more than half of China's total module exports in 2022.

How did China's solar module exports perform in the first quarter?

[Photo/Xinhua] China's solar module exports rose to 41.3 gigawatts of capacity in the first quarter, up 109 percent compared with the same period of the previous year despite the COVID-19 pandemic, according to the General Administration of Customs.
