Solar on-site energy is portable

Overview

A portable power system — aka solar generator, solar power station, portable power bank or battery box — stores energy to be used at a later time. Depending on the model, it can be charged via solar panels, wind generators, a 120-volt household plug or a 12-volt car outlet.

A portable power system — aka solar generator, solar power station, portable power bank or battery box — stores energy to be used at a later time. Depending on the model, it can be charged via solar panels, wind generators, a 120-volt household plug or a 12-volt car outlet.

Want to bring your coffeemaker camping or run your jigsaw off-grid?

You can do that with a portable solar power system. My partner and I are on an international quest to uncover the mysteries of portable solar power systems. We've put them to the test on and off road, across thousands of miles from.
