Solar panels at the Peruvian solar plant

Overview

Zelestra, a Spanish renewable energy company, has officially switched on the country's largest solar farm. The solar farm, dubbed the San Martín project, consists of 450,000 solar panels and will generate over 830 GWh of clean energy annually, powering more than 400,000 homes.

Zelestra, a Spanish renewable energy company, has officially switched on the country's largest solar farm. The solar farm, dubbed the San Martín project, consists of 450,000 solar panels and will generate over 830 GWh of clean energy annually, powering more than 400,000 homes.

Peru has taken a significant step forward in its renewable energy journey with the opening of the San Martín Solar Park—the nation's first large-scale solar power plant. Located in the lush Amazon, this visionary 300 MW project is the largest of its kind in the region. Its launch is a vital part of.

Solar PV capacity accounted for 16.4% of total power plant installations globally in 2023, according to GlobalData, with total recorded solar PV capacity of 1,496GW. This is expected to contribute 33.7% by the end of 2030 with capacity of installations aggregating up to 4,822GW. Of the total global.
