## Overview

---

In 2011, The United States and Saudi Arabia jointly set up a solar-research station in Al-Uyaynah village. The village, located about 30 miles northwest of Riyadh, had no electric supply at the time. The station is operated by the King Abdulaziz City for Science and Technology. The agency established an experimental assembly line at the site to manufacture solar panels. The equip. OverviewSolar power in has become more important to the country as oil prices have risen. Saudi Arabia is located in the Arabian Peninsula, where it receives 12 hours of sun a day. Saudi Arabia has the potential to.

- The Sakaka solar plant is located in Sakaka City, Saudi Arabia. Construction on the project began in November 2018 and the project finished in November 2019. The plant produces roughly 900 GWh of electricity p.

The main technologies Saudi Arabia employs are photovoltaic and concentrated solar power. Of these two, photovoltaic (PV) systems are the most commonly applied throughout Saudi Arabi.
