South African Telecommunications Base Station EMS Contractor

Overview

How can afrikamasts support my next deployment?

Reach out to discuss how we can support your next deployment. Afrikamasts provides a supply only or turnkey civil and rigging service for a range of masts that are suitable for Wireless Internet Service Providers (WISP), radio networks, security industry, mining and agriculture. Delivery country wide as well as export to all SADC countries.

Who is siyaphambili telecoms?

Siyaphambili Telecoms is a leading company in the engineering, construction and operation of base stations and infrastructure of mobile operators. Being skilled and experienced in all aspects of civil and construction, Siyphambili built a strong reputation for delivering a quality service, on time, and at a competitive price.

What does a base station technician do?

Site surveys and reticulation, equipment installations and commissioning of Base Station cell sites. Complete installations and Base configuring of IP equipment. We have a division that provides drive testing and performs network changes for RF Network Optimization. Optical Fibre installations: Fibre hauling and splicing in the access networks.
