# South Korea s solar panels are facing south

## Overview

---

Starting this month, parking lots in South Korea with more than 80 spaces will be required to install solar canopies and carports.

Starting this month, parking lots in South Korea with more than 80 spaces will be required to install solar canopies and carports.

Starting this month, parking lots in South Korea with more than 80 spaces will be required to install solar canopies and carports. But, unlike similar laws that have been proposed in the US, this new law doesn't just apply to new construction - existing lots will have to comply as well! South.

Korea is the latest country to take solar parking seriously. Starting at the end of this month, parking lots in South Korea with 1,000 square meters or more (equivalent to about 80 or more standard parking spaces) are required to install solar canopies or solar carports. This will catapult Korea to.

South Korea has actively promoted the use of renewable energy sources in recent years to increase its share in the country's energy mix. This and the warming temperatures brought on by climate change have created an opportune moment for the country's solar power industry. South Korea's limited land.

Recently, JA Solar signed a cooperation agreement with South Korea's Daeho Group to jointly support Xiehe New Energy in constructing a 21MW solar power plant in Gangwon Province, South Korea. JA Solar will supply high-efficiency PV modules for the project, which is expected to be grid-connected in.
