Standard PV module prices in the Democratic Republic of Congo

Overview

In 2025, solar cell prices for residential users range from \$2.80 to \$3.80 per watt, but this can vary by the location and size of the system, as well as the complexity of the installation. Thus, a 6 kW solar cell system can cost between \$16,800 and \$22,800 even before incentives from.

In 2025, solar cell prices for residential users range from \$2.80 to \$3.80 per watt, but this can vary by the location and size of the system, as well as the complexity of the installation. Thus, a 6 kW solar cell system can cost between \$16,800 and \$22,800 even before incentives from.

The Democratic Republic of Congo receives an average 1,740 hours of sunlight per year. 1 In the Democratic Republic of Congo (DRC), the yearly average energy production from solar panels is estimated to be around 1,400 to 1,800 kWh per kWp installed. 2 The average cost of electricity for households.

IZUBA is a solar energy company established in the Democratic Republic of Congo and headquartered in Goma / North-Kivu, that specializes in EPCM (engineering, procurement, construction and management) services for grid-tied and off-grid / mini-grid solar PV projects. IZUBA is committed to helping.

The average energy production per kW of installed solar in Lubumbashi varies across seasons, with 5.85 kWh/day during Summer, 6.08 kWh/day in Autumn, 6.34 kWh/day in Winter, and the highest rate of ?
