State Grid enters 5G base station market

Overview

How big is the 5G base station market?

As market dynamics shift and demand for diverse options increases, the 5G base station market is expected to thrive, with continuous innovation and broader adoption fueling its future trajectory. The global 5g base station market size was valued at USD 22.9 billion in 2024, with a projected growth to USD 20.78 billion by 2033, at a CAGR of -1.1%.

Which region has the largest 5G base station market in 2024?

Asia Pacific registered dominance in the 5G base station market by holding the largest share in 2024. This is mainly due to the rapid expansion of the telecommunication sector, especially in emerging countries like India and South Korea. The region is likely to sustain a growth trajectory in the coming years.

How will Europe's 5G base station market evolve from 2024 to 2030?

The Europe 5G base station market is poised for significant growth from 2024 to 2030. The European regulatory environment supports 5G deployment, with policies designed to facilitate the rollout of 5G infrastructure. This includes streamlined permitting processes, clear spectrum allocation strategies, and efforts to reduce regulatory barriers.

Why do we need a 5G base station?

As the number of IoT devices continues to grow, particularly in sectors such as healthcare, agriculture, transportation, and manufacturing, there is an increasing need for a robust and expansive 5G network. This demand is driving the installation of more 5G base stations to ensure that IoT systems can operate efficiently and reliably.

What is the 5G standalone segment?

The 5G standalone segment is expected to grow significantly from 2024 to

2030. The 5G standalone architecture is designed to fully leverage 5G's capabilities, providing ultra-low latency, higher data rates, and greater network flexibility.

Which companies are partnering with 5G in 2025?

January 2025: Nokia secured a USD 2.3 billion contract with Bharti Airtel for 5G radio access across 17 Indian states. December 2024: Ericsson announced a partnership with Microsoft to pair Azure Edge Zones with 5G base stations for ultra-low-latency industrial use cases.
