**Tajikistan solar power  
generation direct sales**

## Overview

---

Solar energy is transforming Tajikistan's power landscape, with direct sales models unlocking new opportunities for businesses and communities. This article explores the growing demand for solar power systems in Tajikistan, analyzes market trends, and provides actionable insights for stakeholders. Can solar energy be used in Tajikistan?

Use of available solar energy in Tajikistan can meet 10-20% of energy demand. Estimated potential of solar energy in Tajikistan is about 25 billion kWh / year. This potential is not used, if not to take into account some of its use for water heating.

Can Tajikistan become a net energy exporter?

The Government of Tajikistan aims to transform itself from a net energy importer to a net energy exporter, on the strength of its potential for hydropower and solar power production. According to the World Bank, Tajikistan's power production is 92 percent hydropower, six percent hydrocarbon, and two percent from other sources.

How much electricity is generated in Tajikistan?

Annual electricity generation in the Tajik energy system, consisting mainly of hydro power plants, is 16.5 billion kWh. It should be noted that more than 98% of electricity in Tajikistan is generated by hydropower plants, including 97% - by large and medium HPP.

What is the energy sector of Tajikistan?

The energy sector of Tajikistan includes several entities. The electric power is the responsibility of the State-owned joint stock company Barqi Tojik, which entirely controls production, transportation and distribution of electricity in Tajikistan.

What is Tajikistan's hydropower potential?

Tajikistan's hydropower potential is estimated at 527 billion kWh per year, which exceeds the existing electricity consumption of the countries of Central Asia by 300%. The country's largest project is the Roghun Dam Hydropower Plant project, which when completed is estimated to produce 3600 Megawatts of energy.

Does Tajikistan have a power system?

The existing electrical transmission and distribution systems of Tajikistan, designed in the 1970s during the Soviet era, are also being upgraded and expanded, allowing transmission of power from Tajikistan to surrounding countries.
