# Tajikistan solar power station energy storage price

## Overview

---

Does Tajikistan use solar energy?

The estimated solar potential is about 25 billion kWh/year in Tajikistan. There are about 2,100 to 3,000 hours of solar energy per year. While this potential has not yet been exploited, Tajikistan does utilize some solar resources for water heating purposes. Share of energy types on cooking energy in urban and rural areas of Tajikistan.

How much does electricity cost in Tajikistan?

Prices vary but people typically pay 1.5 US cents/kWh. The TajikAluminum Company (TALCO), is the largest consumer in Tajikistan and uses about 50% of total electricity consumption. Many components of the transmission and distribution system are in bad condition and need to be replaced.

What is the solar energy potential of Tajikistan?

The climate of Tajikistan is very favorable for the use of solar energy, with an average of 280-330 sunny days per year. The total solar radiation intensity varies during the year between 280 and 925 MJ/m<sup>2</sup> in the foothills, and between 360 and 1120 MJ/m<sup>2</sup> in the highlands. Tajikistan does not have specified solar energy reserves mentioned in the provided text. The text only mentions their coal reserves.
