Thailand Green Energy solar Site

Overview

What is Thailand doing with solar energy?

Flagship solar energy projects in Thailand are becoming increasingly innovative: the state utility, EGAT, is tendering a 24 MW floating solar array at Ubol Ratana Dam, the first phase of a 2.7 GW hydro-floating solar hybrid program that avoids land-use conflicts while boosting reservoir efficiency. Policy momentum is catching up with engineering.

What's going on with rooftop solar in Thailand?

Rooftop solar is also expanding fast, with the quota for public installations rising from 50 MW to 200 MW, plus an additional 50 MW dedicated to Bangkok. These changes reflect not just ambition, but momentum. [Read Also: The Promise of Thailand Renewable Energy Initiatives.](#)

Why is Thailand relying on more than just solar?

To close this gap, Thailand is relying on more than just solar. The government's Alternative Energy Development Plan (AEDP) promotes energy diversification, including storage systems and emerging technologies like green hydrogen. These strategies are designed to not only boost generation capacity but also ensure energy stability and resilience.

How to choose a solar energy company in Thailand?

As solar is becoming cheaper and more popular, choosing among the many solar energy companies in Thailand is getting harder, especially so as each installer may offer you different packages, services and energy solutions. Finding the right solar installer for your roof is important in ensuring a hassle-free installation that you are satisfied with.

Who is Solaris green energy?

Harness the power of the sun with Solaris Green Energy, your go-to source for renewable energy solutions in Thailand. Our offerings include a diverse

selection of the latest solar products – from solar panels and inverters to complete solar systems – designed to meet the unique needs of both residential and commercial markets.

Is Thailand getting a cleaner energy future?

Thailand is making big moves toward a cleaner energy future. The government has quadrupled the annual quota for public solar power projects, from 100 MW to 400 MW in 2024, as part of a broader push to cut electricity costs by 8% and reach carbon neutrality by 2065.
