Thailand s ground-mounted solar power generation with energy storage

Overview

This portfolio includes eight ground-mounted solar photovoltaic (PV) plants with a combined capacity of 393 megawatts (MW) and four solar PV plants equipped with battery energy storage systems, totaling 256 MW and 396 megawatt-hours of storage.

Bangkok, September 15, 2025 - Thailand is accelerating its energy transition with ambitious policies and economic incentives, positioning itself as a key player in Southeast Asia's renewable energy landscape. From floating solar projects to large-scale energy storage and innovative tax reforms.

Adding 32GW of new solar capacity, plus 15GWh of batteries, to Thailand's power generation deployment targets could cut power generation costs by as much as US\$1.8 billion. This is according to the latest report from Ember Climate, 'Thailand's cost-optimal pathway to a sustainable economy', which.

The Asian Development Bank (ADB) and Gulf Renewable Energy Company Limited have entered into a USD 820 million loan agreement to finance a portfolio of 12 renewable energy projects in Thailand. This portfolio includes
