The latest energy storage projects under construction in East Asia

Overview

TASHKENT, UZBEKISTAN (29 October 2025) — The Asian Development Bank (ADB), together with ACWA Power Company, Sumitomo Corporation, Chubu Electric Power Co. Inc., and Shikoku Electric Power Co. Inc., has signed a landmark financing package to build two utility-scale solar power plants with.

TASHKENT, UZBEKISTAN (29 October 2025) — The Asian Development Bank (ADB), together with ACWA Power Company, Sumitomo Corporation, Chubu Electric Power Co. Inc., and Shikoku Electric Power Co. Inc., has signed a landmark financing package to build two utility-scale solar power plants with.

(AboitizPower), through Therma Power, Inc.'s wholly owned subsidiary East Asia Utilities Corporation (EAUC), is set to commence construction of its 30-megawatt (MW) hybrid battery energy storage system (BESS) project at the Mactan Economic Zone in Cebu. The project is slated for commissioning in.

A massive planned buildout of pumped storage hydropower (PSH) in Eastern Asia, driven by China, would allow this region to single-handedly meet the International Renewable Energy Agency's (IRENA) 1.5°C Scenario target of 420 gigawatts of pumped storage worldwide by 2050, according to new data from.

The proliferation of battery and other renewables technology firms is no guarantee of sustainability, just as profitability today does not promise innovation tomorrow. East Asia is a powerhouse in the global renewables sector. Importantly, this is not only due to China's sizable market share when.

US-based Unigrid has expanded sodium-ion battery production to 100 MWh a year through contract manufacturing in Asia, with a 1 GWh target for 2026. The Chinese manufacturer stated that its new heat pump system is the first on the market to achieve a coefficient of performance of 7. The product.

In this article, PF Nexus highlights the Top 10 energy storage developers driving the energy transition in Asia. Asia aims to triple its renewable energy capacity by 2030, requiring accelerated investments and developments. Key

actions to achieve this goal include cutting subsidies for.

JERA Nex is a new renewable energy developer launched by JERA, Japan's largest power generation company. Headquartered in London, and with a global remit, JERA Nex has a portfolio of renewable assets that includes offshore wind in Europe, Taiwan and Japan, and onshore wind, solar, and battery.
