The latest planning of new energy charging stations

Overview

Led by Tesla, ChargePoint and EVgo, the deployment of new public fast charging ports reached record levels in the second quarter. Something profound is unfolding in the U.S. electric vehicle.

Led by Tesla, ChargePoint and EVgo, the deployment of new public fast charging ports reached record levels in the second quarter. Something profound is unfolding in the U.S. electric vehicle.

The quarterly reports on EV charging infrastructure trends from the Alternative Fueling Station Locator provide snapshots of the state of EV charging infrastructure in the United States. Using data from the Station Locator, these reports break down the growth of public and private non-residential.

The U.S. now has nearly 199,379 EV charging ports, doubling the network since the Biden-Harris Administration took office. 40 states have begun the process to build NEVI-funded charging stations, with 29 states awarding over 2,800 fast chargers at 700 locations. California, Connecticut, and Alabama.

Explore the latest developments in EV charging infrastructure in the US, including the introduction of new fast-charging stations and advancements in technology that support long-distance travel and urban mobility. Many of Pilot's charging locations offer overhead canopies and pull-through charging.
