# Ukraine Energy Storage Peaking Power Station Project

## Overview

---

DTEK and Fluence have begun commissioning Ukraine's largest battery energy storage system, a 200 MW/400 MWh installation spread across six sites that represents one of the biggest storage deployments in Eastern Europe.

DTEK and Fluence have begun commissioning Ukraine's largest battery energy storage system, a 200 MW/400 MWh installation spread across six sites that represents one of the biggest storage deployments in Eastern Europe.

DTEK's Fluence Gridstack battery units at one of six energy storage sites across Ukraine, part of the country's largest battery energy storage project announced on July 10, 2025. (DTEK press service) DTEK, Ukraine's biggest private energy company, has begun final commissioning of the country's.

DTEK, Ukraine's largest private energy company, has selected Fluence Energy B.V., a subsidiary of Fluence Energy, Inc. (NASDAQ: FLNC) ("Fluence"), a global market leader delivering intelligent energy storage, operational services, and asset optimization software, to supply Ukraine's first.

Ukraine's 200 MW/400 MWh battery project dwarfs most Eastern European installations, and is expected to come online in October 2025, ahead of the winter. From ESS News DTEK and Fluence have begun commissioning Ukraine's largest battery energy storage system, a 200 MW/400 MWh installation spread.

When Russia began targeting Ukraine's power grid in 2022, it didn't just aim to disrupt electricity — it sought to freeze the nation's will. By late 2024, 90% of DTEK's thermal power plants had been damaged or destroyed. Winter loomed. Homes went dark. Hospitals relied on generators. The country.

DTEK unveils €140m plan for 200MW battery energy storage systems in Ukraine. (Credit: DTEK) DTEK Group, a private investor in Ukraine's energy sector, has announced a €140m investment plan to construct a series of battery energy storage systems (BESS) in the country with a combined

capacity of.

DTEK plans to establish a series of energy storage systems (ESS) across Ukraine, with a total capacity of 200 MW, aimed at enhancing the nation's green and secure energy infrastructure. The project will involve a €140 million investment and is expected to be operational by September 2025. These ESS.
