

## A-Core Container

# Vietnam outdoor energy storage power supply

## Overview

---

Why do we need battery energy storage systems in Vietnam?

At the same time, the demand for battery energy storage systems (BESSs) is accelerating, driven by Vietnam's abundant renewable energy (RE) potential, particularly in solar and wind power. However, owing to the intermittent nature of these energy sources, storage solutions are required to ensure continuous electricity supply.

Why is the demand for battery energy storage systems accelerating in Vietnam?

Export-oriented businesses, especially in manufacturing, are under growing pressure to meet stringent requirements. At the same time, the demand for battery energy storage systems (BESSs) is accelerating, driven by Vietnam's abundant renewable energy (RE) potential, particularly in solar and wind power.

What is the largest electricity storage project in Vietnam?

The largest electricity storage project in Vietnam is the Bac Ai Pumped Storage Hydropower Project. Located in Ninh Thuan province, the project has a capacity of 1,200 MW and is expected to play a crucial role in stabilizing the grid when it completes in a few years.

Who manages the electricity sector in Vietnam?

The government manages the sector through the Electricity and Renewable Energy Authority (EREA), the Electricity Regulatory Authority of Vietnam (ERAV) and the National System and Market Operator (NSMO) under the Ministry of Industry and Trade (MOIT).

Is Vietnam a good market for energy storage solutions?

Vietnam represents a promising market for German and European small and medium-sized enterprises (SMEs) specialising in energy storage solutions,

thanks to their technical expertise and established reputation in RE technologies.

How will Vietnam's grid infrastructure improve the energy supply?

Vietnam's grid infrastructure is increasingly being modernised to meet the growing demand for energy. An improved grid will facilitate the integration of BESSs, allowing for better management of fluctuations in the supply of energy from renewable sources.
