What are the EMS options for Algerian communication base stations

Overview

What types of communications are available in Algeria?

In Algeria, there are various types of communications available, including telephones, mass media, and the Internet. In October 2013, the Algeria Regulatory Authority for Post and Telecommunication awarded 3G licences to the three mobile operators in Algeria: Mobilis, Ooredoo Algeria and Djezzy.

Who has a 3G license in Algeria?

In October 2013, the Algeria Regulatory Authority for Post and Telecommunication awarded 3G licenses to the three mobile operators in Algeria: Mobilis, Ooredoo, and Djezzy.* The mobile operator companies promised their clients better mobile internet service.

Should radio communication systems be used for early warning and disaster relief?

Developing and implementing common technical characteristics and guidelines for radio communication systems for early warning and disaster relief, would promote a common technical basis in planning for and responding effectively to an emergency.

What is analog transmission of electrocardiograms in EMS?

Analog transmission of electrocardiograms was quite common in the early days of modern EMS, but these modulated 1000 Hz tones are heard less and less as more and more EMS medical traffic is handled via cell phone.

Why did Anonymous IRC start an operation against the Algeria Regulatory Authority?

In August 2012, a group in the Anonymous IRC channel #OpAlgeria started an operation against the Algerian Regulatory Authority for Post and Telecommunication because it made a decision to require authorization of its users before allowing them to use any kind of encryption (for example; IpSec).
