# What is the Indian power station energy storage system

## Overview

---

India has recognised Pumped Storage Hydro as a crucial element in achieving its ambitious renewable energy targets. As per the Central Electricity Authority, India has an estimated on-river pumped storage hydro potential of around 103 gigawatts.

India has recognised Pumped Storage Hydro as a crucial element in achieving its ambitious renewable energy targets. As per the Central Electricity Authority, India has an estimated on-river pumped storage hydro potential of around 103 gigawatts.

State-of-the-art energy storage solution reinforces commitment to India's renewable energy targets and bolsters grid stability initiatives Cummins India Limited (“Cummins”), one of the leading power solutions technology providers, today announced the launch of its Battery Energy Storage Systems.

India has marked a significant milestone in its renewable energy journey with the launch of its largest battery storage facility, inaugurated by Prime Minister Narendra Modi during his recent visit to the site. The state's Solar Energy Corporation of India (SECI) announced the commissioning of a.
