What is the price of new energy storage power station

Overview

As of October 2025, the average storage system cost in New York is \$1463/kWh. Given a storage system size of 13 kWh, an average storage installation in New York ranges in cost from \$16,169 to \$21,875, with the average gross price for storage in New York coming in at \$19,022.

As of October 2025, the average storage system cost in New York is \$1463/kWh. Given a storage system size of 13 kWh, an average storage installation in New York ranges in cost from \$16,169 to \$21,875, with the average gross price for storage in New York coming in at \$19,022.

Discover the true cost of energy storage power stations. Learn about equipment, construction, O&M, financing, and factors shaping storage system investments.

Navigating the pricing of energy storage power stations involves a comprehensive analysis of diverse factors and dynamics interwoven into the industry landscape.

Additional storage technologies will be added as representative cost and performance metrics are verified. The interactive figure below presents results on the total installed ESS cost ranges by technology, year, power capacity (MW), and duration (hr).

The answer lies in one magic number: 2025 energy storage power station prices. By mid-decade, experts predict a seismic shift in how we store energy – and more importantly, what it'll cost.
