Overview

Top 5 American solar panel manufacturers in 2025: A list of top U.S. solar panel manufacturers. Find the best companies that produce high-quality, American-made solar panels for the residential and commercial market.

Top 5 American solar panel manufacturers in 2025: A list of top U.S. solar panel manufacturers. Find the best companies that produce high-quality, American-made solar panels for the residential and commercial market.

In 2025, the top five solar panel manufacturers in the U.S. based on production capacity are: Although some of these companies are foreign-owned, they all manufacture solar panels on American soil, providing jobs for thousands of workers. Let's take a closer look at these leading solar.

This is a current grouping of solar manufacturers in the United States that produce solar panels and their associated materials for the traditional residential, commercial and utility-scale markets. This data is collected by Solar Power World editors and will be continually updated as facilities.

Manufacturing Renaissance: US solar manufacturing capacity has grown 190% year-over-year in 2024, reaching over 51 GW annually—enough to meet nearly all domestic demand while creating over 33,000 manufacturing jobs across the country. Supply Chain Gaps Remain Critical: While module assembly is.

Built our own database and rating system for solar equipment, including solar panels, inverters, and batteries. We won't charge you anything to get quotes through our marketplace. Instead, installers and other service providers pay us a small fee to participate after we vet them for reliability and.

Solar panel manufacturers in the USA are steering record-breaking solar installations in 2025. According to the US Department of Energy, in Q1 of 2025, the US installed a capacity of 10.8 GWdc of new solar capacity, while 8.6 GW of module manufacturing capacity was added. Texas and Florida recorded.

The U.S. Solar Photovoltaic Manufacturing Map shows only active manufacturing sites that contribute to the solar photovoltaic supply chain. It details their nameplate capacities, or the full amount of potential output at an existing facility, where known. This does not imply that these facilities.
