# Zambia Solar Mobile Project

## Overview

---

With construction set to begin in March 2024, the project represents a key step in Zambia's strategy to increase solar production and address the nation's power deficit. How does solar power work in Zambia?

Solar power in Zambia primarily uses solar photovoltaics (PV) to generate electricity. Several communities, entrepreneurs, the government, and NGOs collaborate to increase the share of solar power in the country.

Will new solar companies emerge in Zambia?

Given the growing demand and government initiatives, it is very likely that new solar companies will arise in Zambia. The government aims to develop 600MW on-grid solar projects in the coming 2-3 years, with the GET FiT program supported by the German Development Bank.

Is there a solar market in Zambia?

Yes, the Zambian solar market is growing. Although it is still relatively small compared to countries like Tanzania, there is much room for solar to grow due to the increasing electricity demand in Zambia. Currently, 95% of the electricity supply comes from hydropower, with less than 1% from other renewable sources.

Which companies offer solar home systems in Zambia?

In Zambia, Vitalite offers pay-as-you-go home systems using modern mobile technology to help low-income households. Aurora Power Solutions also operates in the region, focusing on solar power.

How many solar mini-grids will Zambia have by 2030?

"Our target is to have at least 200 solar mini-grids operational by 2030, ensuring that every rural district in Zambia has access to clean, affordable, and reliable electricity," said Makozi Chikote, Minister of Energy of Zambia.

How many Zambians are still without electricity?

Solar home systems, which are rooftop solar panels that provide electricity for lighting, charging phones and running certain appliances, and mini grids, which are solar electricity generation and storage plants that provide electricity to whole villages – have the potential to reach 8.5 million Zambians currently still without electricity.
